(54) Title: SILICONE FOAM CONTROL COMPOSITIONS

R
|
-(Si - O)-
|
R

(I)

(57) Abstract: A foam control composition comprises a polydiorganosiloxane fluid comprising units of formula (I), where each group R, which may be the same or different, is selected from an alkyl group having 1 to 36 carbon atoms or an aryl group or aralkyl group having up to 36 carbon atoms, the mean number of carbon atoms in the groups R being at least 1.3, and an additive composition having a melting point of at least 35°C comprising 5-50 parts by weight of a non-polar component (A) and 50-95 parts by weight of a component (B) which is miscible with component (A) and is more polar than component (A), at least one of (A) and (B) being miscible with the polysiloxane fluid.
